GO PLACES AN OUTBOARD

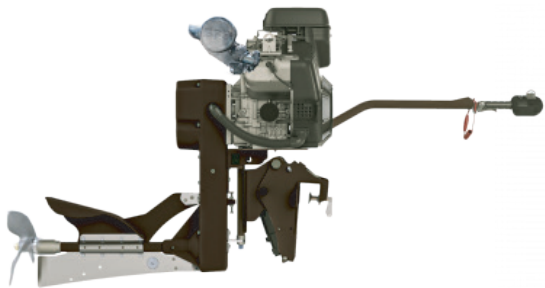

MOTOR **WOULDN'T DARE**

Mud Buddy is best known today as the innovators in the shallow water outboard industry.

Power, durability, reliability - features that have made Mud Buddy the king of the backwater mud motors for more than 25 years.

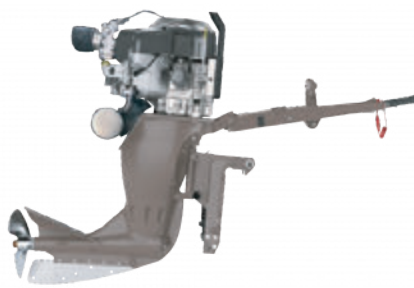

Proudly made in America.

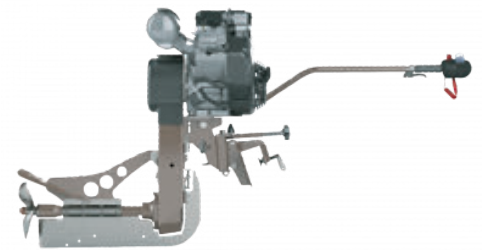

HDR (HYPER DRIVE REVERSE)

A big blade style propeller provides optimum thrust in all conditions, especially deep mud. Exclusive Mud Buddy patented bearing and seal system that keeps grease "in" and mud and sand "out" of the drive to ensure reliable operation in all conditions

SPORT V

Massive gearing and a small profile lower drive unit set this motor apart from other mud motors. It's lean and mean.

MINI HYPER DRIVE SPORT

The Mini's power combined with its lightweight design makes it the ideal choice for smaller boats and loads.

LONGTAILS

Our uniframe, one-piece design, patented bearing drive, adjustable skeg and marine finish are just a few of the features of the Mud Buddy Longtail that contribute to its unfailing design and lasting trustworthiness.
